

ABHISHEK KUMAR

Aspiring Salesforce Developer | Fresher / Trainee | Self-Taught via Trailhead

+91-8340456184 | tech.abhishek.kr@gmail.com | linkedin.com/in/abhishek-sfsolution | github.com/techabhishek108

Open to Entry-Level / Trainee Roles · Remote / Work-From-Home · India

CAREER OBJECTIVE

Motivated fresher with an MCA in Computer Science, seeking an entry-level or trainee Salesforce Developer position. Built strong practical skills in Apex, Lightning Web Components, Flow Builder, and REST API integration entirely through self-directed learning on Trailhead, culminating in three independently designed and deployed Salesforce applications spanning restaurant management, automobile dispatch operations, and college administration. Eager to bring a fast-learning, self-driven attitude to a team environment and grow into a professional Salesforce Developer role.

SELF-LEARNING & TRAILHEAD ACHIEVEMENTS

- 131 Trailhead Badges · 84,225 Trailhead Points · 30+ Trails Completed
- Achieved Trailhead Ranger — the highest rank on Salesforce's official learning platform — entirely through independent, self-paced study
- Completed hands-on Superbadges covering Apex, LWC, Flow, and Integration, applying concepts to real project scenarios
- Currently progressing through the Agentblazer Innovator track, self-learning Salesforce AI and Agentforce automation
- Completed Google Cloud Arcade labs (2026 cohort), including hands-on Compute Engine web app hosting

TECHNICAL SKILLS

- Salesforce Platform: Apex (Triggers, Classes, Batch, Test Classes), LWC, Visualforce, Flow Builder (Screen Flow), SOQL, DML, App Builder, Salesforce Sites / Experience Cloud (LWR), Unmanaged Packages
- Integration & API: REST API, OAuth 2.0, JSON, HTTP Callouts, Postman, Named Credentials, External Client Apps
- Web Technologies: JavaScript (ES6+), HTML5, CSS3
- Database & Query: SOQL, SQL, Relational Data Modeling, Object Relationships, Report Builder
- AI & Emerging Tech: Salesforce Agentforce (in progress), Einstein AI basics, Prompt Engineering fundamentals
- Developer Tools: VS Code, Salesforce CLI, Git, GitHub, Developer Console, Salesforce Inspector, Workbench
- Productivity: Microsoft Word, Microsoft Excel, Google Workspace
- Remote Work Skills: Async communication, self-managed delivery, technical documentation, Zoom / Google Meet

SELF-DRIVEN SALESFORCE PROJECTS

Restaurant E-Management System — Full-Stack Salesforce Application

github.com/techabhishek108/restaurant-management-system

- Designed and built an end-to-end restaurant operations platform covering ordering, kitchen workflow, billing, table management, and guest reservations
- Built a custom data model (Restaurant_Table__c, Menu_Item__c, Restro_Order__c, Order_Item__c, Feedback__c, Inventory__c, Reservation__c) with Record Types, page layouts, and role-based custom Profiles for Chef, Waiter, Restaurant Manager, and Inventory Manager
- Developed 8+ Lightning Web Components including a customer-facing menu and cart, a Kanban-style Chef Kitchen Board, a Waiter Delivery Board, a color-coded Table Management grid, and an Order Payments desk, each backed by dedicated Apex controllers and full test classes
- Built a public-facing Experience Cloud (LWR) site for guest self-ordering, live order tracking with a 4-stage status stepper, and table reservations — configured Guest User security and published the site for public, license-free access
- Packaged the completed system as a Salesforce Unlocked Package and published the full source to a public GitHub repository

Vehicle Challan & Sub-dealer Dispatch Management System — Full-Stack Salesforce Application

github.com/techabhishek108/Automobile-Sub-dealer-Dispatch-System-

- Built a production-style Experience Cloud application for an automobile dealership to manage vehicle dispatch, challans, returns, and complete vehicle movement history for its network of sub-dealers
- Designed a lean 4-object data model (Subdealer__c, Vehicle__c, Challan__c, Challan_Vehicle__c) supporting full vehicle lifecycle traceability across multiple dispatch, return, and re-dispatch cycles without ever duplicating or deleting historical records
- Developed 12+ Lightning Web Components — Generate Challan, Vehicle Return, Challan History, Vehicle Search, Dashboard, Challan Report, Vehicle Report (with CSV export), and a public QR-code Challan Verification page — all backed by dedicated Apex controllers and Apex test classes
- Implemented PDF generation via a Visualforce renderAs="pdf" letterhead document, dynamic QR-code generation for challan verification, and an automatic Indian-currency amount-in-words converter
- Built a safe “Cancel & Re-issue” workflow for correcting dispatch errors that preserves complete audit history instead of deleting records, in line with strict historical-data-integrity requirements

Bhagalpur, Bihar

- Independently designed and built an end-to-end CRM application to replace manual college administration, applying Trailhead learning to a real-world use case
- Designed custom data model with Objects for Student, Subject, Admission, and Examination, including validation rules and page layouts
- Developed Lightning Web Components (JavaScript + HTML + CSS) for student search, an academic dashboard, and an admission tracker
- Built Apex Triggers for automated roll number generation and marks computation, removing manual data-entry errors
- Created Visualforce PDF templates for admission letters and examination slips
- Designed multi-step Screen Flows to automate staff-facing academic and admission workflows
- Deployed a public-facing student portal via Salesforce Sites, accessible without a Salesforce licence
- Wrote Apex Test Classes with full code coverage and deployed to a production-equivalent org
- Tested REST API and OAuth 2.0 connectivity concepts using Postman

EDUCATION

Master of Computer Applications (MCA) — Computer Science

Jul 2021 – Jul 2023

Kalinga University, Raipur

Bachelor of Commerce (B.Com) — Accounting

Aug 2017 – Dec 2020

Marwari College, Bhagalpur

ADDITIONAL EXPERIENCE (IT SUPPORT)

IT System Support Technician

Feb 2025 – Dec 2025

Bibhuti Automobiles Pvt. Ltd. · Bhagalpur, Bihar

- Diagnosed and resolved daily IT, LAN/WAN, and hardware issues, maintaining near-zero downtime for 50+ workstations
- Administered Windows Server environment, managing user accounts, access controls, and permissions

IT Operations & Training Support

Jul 2023 – Jan 2025

Bhagalpur City College · Bhagalpur, Bihar

- Provided end-to-end technical support for college IT infrastructure, including servers, labs, and network systems
